

ECRad Event

Connecting Early Career

Researchers in Radiation Protection

May 13-14, 2024

BfS, Munich

OBJECTIVES

Promoting the interconnection of young scientists across the diverse European Radiation Protection networks and broadening outreach through the establishment of an umbrella framework to promote collaboration and provide support to early career researchers (ECRs) in the field.

TARGET AUDIENCE

Young researchers in radiation protection will benefit from this event and gain valuable insights. We extend our invitation to junior and senior researchers, regulatory authorities, consultants, and policymakers who share a keen interest in supporting and developing young talents.

KEY TOPICS

- ICRP mentorship program
- IsoRED mentorship program
- Initiatives to support ECRs
- ECR networks in Europe
- Umbrella European framework
- Careers in radiation protection
