
Activity Report: Conference participation

Name: Omar Elsaeed

Affiliation: Federal office of radiation protection (BfS)

Conference: European Radiation Research Society (ERRS), 49th annual meeting

Location: Brussels, Belgium

Dates: 02.09.2025 – 04.09.2025

The 49th annual meeting European Radiation Research Society (ERRS), organized by leading experts in radiation research, aimed to bring together leading experts, early-career researchers, and professionals in the field of radiation research. It also paved the road for a dynamic exchange of knowledge, collaboration, and ideas.

During the conference, I had the opportunity to give a talk about current progress in my PhD project. The oral presentation was titled “Fenofibrate as a Potential Protective Agent for Radiation-Induced Cardiovascular Disease: Insights from Endothelial Cell Proteomics“. Additionally, the conference offered a great opportunity to attend keynote lectures, panel discussions, and technical sessions relevant to my field of study, Molecular and Cellular Radiation Effects. Furthermore, I had the chance to engage in networking activities with young researchers, scientific experts and fellow participants.

Throughout the conference, I gained valuable feedback on ongoing research from experts and peers, identified potential opportunities for collaboration, and increased visibility for my research within the scientific community. Additionally, I acquired new insights and updates on cutting-edge research and methodologies used in the field of radiation biology.

All in all, participation in the 49th annual meeting European Radiation Research Society was a highly enriching experience that will hopefully contribute to my professional development and support the advancement of my current research work.
