

Activity Report for PIANOFORTE Grant

Name: Iago Mosquera Cereijo

Institution: Hospital Clínico Universitario de Valencia

Travel Dates: 10-15 September 2024

Destination: Munich

Event: ECMP Congress 2024

Thanks to PIANOFORTE, I had the chance to attend the ECMP Congress in Munich from September 10 to 14. It was a fantastic opportunity to stay updated with the latest advancements in the field of medical physics and share my work with the community.

The event was packed with scientific sessions led by both seasoned experts and emerging young professionals like myself. It was an ideal setting for the training of medical physicists at different stages of their careers.

In my view, the most enriching part of the congress was the networking. Engaging in discussions and debates with colleagues from across Europe fostered an exchange of ideas, which is crucial for developing knowledge. These interactions were both inspiring and informative, significantly contributing to my professional growth.

Another highlight was the industry exhibition, where we had the chance to see and even try out a wide range of new technologies, with experts from various companies on hand to explain and demonstrate their products.

The congress also did a great job of motivating young researchers to present their work. Often, it's challenging for us younger professionals to get our work out there, but the congress provided a valuable platform for us to showcase our research and push ourselves to produce more.

Overall, I found the experience of attending the congress to be excellent. The knowledge gained, the people I met, and the new ideas I came away with were incredibly valuable. I want to extend my thanks once again to the PIANOFORTE grant system for providing this amazing opportunity.
