
Conference Details:

Event: European Society for Radiotherapy and Oncology 2024

Conference Location: Scottish Event Campus, Exhibition Way, Glasgow G3 8YW,
United Kingdom

Dates: 3 May -7 May 2024

Overview

The programme took a comprehensive look at where radiotherapy is today and where it is going, as well as focussing on where we can bridge gaps in provision of optimal radiotherapy to all. Along with symposia, debates and teaching lectures, the scientific programme feature panel discussions and pitch sessions. Joint sessions with partner associations connected delegates with new communities and increase the reach of the ESTRO population.

Participation in this conference provided an enriching experience, with the presentation and discussion of an oral poster. In addition, it was possible to establish contacts to improve the results of an international project (SONORA) funded by PIANOFORTE. Finally, it was also possible to establish ERASMUS + contacts in the context of creating a project for the next academic year on CBCT.
